

NEWS RELEASE

New Dielectric Manufacturing Group Becomes Industry's Largest Single-Source For Plastic, Metal and Busbar Solutions

RICHFIELD, WIS., May 6, 2026— Dielectric Manufacturing, EMS Industrial, and Centerline Machine have officially combined to form [Dielectric Manufacturing Group](#), providing the industry's broadest offering of precision plastic and metal parts, machining, fabrication and custom busbar solutions. This strategic union brings together decades of experience, expanded service offerings and a shared commitment to supporting OEMs and industrial manufacturers with scalable parts production and highly responsive service.

"Customers can expect the same trusted relationships, now backed by greater resources and enhanced capabilities," says Mike Esser, President and CEO. "Together, our team has hundreds of years of combined engineering experience, and our companies all achieve a stellar on-time delivery record."

As a single-source supplier, Dielectric Manufacturing Group provides support from concept through delivery of small- to large-volume production runs. With available in-house quality control and inspection, assembly and kitting services, and inventory programs, companies have the flexibility to choose whatever level of support they need.
